## B.A. in Engineering 2

2 Required for chemical engineering. CHE 344/CHE 345 and CHE 348/CHE 349 strongly recommended.
3 Students may test into this course via successful completion of the Math and Computer Science department placement exam or by completing MAT 123M and the Math and Computer Science department placement exam requirements.
4 Degree must be completed at another school of engineering.
Courses whose number is followed by a letter fulfill a General Education requirement. Students may not declare a B.A. in Engineering and a Minor in Engineering.

[^0]:    1 The additional studies taken at another school of engineering will fulfill the elective requirements for graduation from Bethel. All requirements for an engineering degree at another school of engineering must be complete to receive Bethel degree.
