Interdisciplinary Courses 2

GS 801 • Integral Research and Writing 4 Credits

The culmination of all doctoral level work is a research project commonly called a thesis or dissertation. Because the Doctor of Ministry degree is a "professional" doctoral degree, its focus is more practical than academic. However, it still requires a very high level of research, analysis, synthesis and writing. The purpose of the research project is to contribute new knowledge, models, and/or methodologies to the practice of ministry. The research project may also focus on discovering solutions to ministry challenges. Integral Research and Writing provides students with a comprehensive conceptual framework for conducting effective qualitative (and/or mixed method) research. This course also introduces students to a variety of research methodologies from which to pursue their research. Additionally, students will participate in an Integral Research Inventory to help them discover their most natural "research path" and begin the process of developing an integral research proposal. Students will also be exposed to matters related to doctoral level research writing and become familiar with the style guide that dictates the final form the research project report will take. The specific expectations of the course project will be approved by the course instructor. This is a required course and should be taken by all students no later than their second course.

Special Notes: This should be the very first course that DMin students take.
